

Kränzle Catalogue / Program

PROFESSIONAL SERIES

VALID FROM FEBRUARY 1, 2018

QUALITY IN ALL AREAS

FROM PROS, FOR PROS!

Managing director Ludwig Kränzle

Company founder & managing directorJosef Kränzle

TRADITION MEETS INNOVATION! WE SET NEW STANDARDS!

For more than 40 years, the name of Kränzle has been synonymous with highest quality, innovation power and keen environmental awareness. Our engineers from research and development continually work on innovations that offer exemplary solutions to the global demands of the cleaning industry. High-quality materials, sophisticated technology and experienced employees are the building blocks that have made the Kränzle brand a global quality leader for cleaning machines.

As a team, we go beyond our own limits every single day in order to provide important impulses for new developments and product improvements for our customers from around the world. Tradition meets innovation! We set new standards!

Management members. From left to right:

Marc Tritschler, Michael Iske, Josef Kränzle, Rainer Bolkart, Sigrid Kränzle, Ludwig Kränzle, Manfred Bauer,

OUR QUALITY ASSURANCE

Kränzle products are available exclusively from specialist dealers. And for good reason. If you pose high demands to quality and function of your machine, you will expect professional service and support as well. This is offered by trained and authorised Kränzle specialist dealers.

QUALITY

"For us, quality means to durably fulfil or to surpass clearly defined requirements in all areas of the company."

■ FLEXIBILITY

"For us, flexibility means to accept the challenges of the market and of our customers with a spirit of openness and to meet them within the frame of our resources."

■ INNOVATION

"For us, innovation means to use our own research and development to provide our customers with a genuine value in performance, safety, handling and efficiency."

INDUSTRY SOLUTIONS

FOR ANY APPLICATION IS A PERFECT KRANZLE SOLUTION!

EACH INDUSTRY REQUIRES INDIVIDUAL SOLUTIONS

Requirements and tasks to high-pressure cleaners, wet and dry vacuum cleaners as well as power sweepers considerably differ from industry to industry. Therefore, Kränzle has developed a product range which, thanks to its diversity and depth, complies with all requirements superiorly.

No demands are too high, no cleaning tasks too difficult. Kränzle is your professional partner for any demand from your industry.

CLEANING OF BUILDINGS - HOUSE & YARD

Kränzle cleaning units will make everything around your house and yard shine again. Terraces, driveways, stairwells, walls, fences or garden furniture – Kränzle high-pressure cleaners, wet and dry vacuum cleaners and sweepers will make anything shine. The comprehensive accessories range offers ideal solutions for any cleaning task.

- Private users (house & yard)
- Building cleaning
- Caretaker operations

GARAGES, FORWARDING COMPANIES

The cleanliness of outdoor facilities, the workshop and vehicles serves as a calling card for car dealers, garages and motor vehicle companies, forwarders, bus and taxi providers. There is no second chance to make a first impression. Kränzle offers perfect cleaning solutions for all requirements.

- Automotive industry
- Bus and taxi operations
- Motor vehicle operations
- Fleet
- Forwarders

AGRICULTURE & ANIMAL HUSBANDRY

Cleanliness is an elementary prerequisite for health, hygiene and best working conditions in agriculture and animal husbandry. For cleaning of tractors and machines, after hard and dusty deployment in the field or for cleaning the stables after the end of an inspection: A Kränzle high-pressure cleaner is a must-have for any agricultural operation.

- Agricultural technology
- Forestry operations
- Animal husbandry
- Biogas plants

CRAFT SECTOR

Tradespeople are subject to great time and cost pressure, working under difficult and frequently changing working conditions. Flexible, high-performance and at the same time extremely robust cleaning units make everyday work easier and ensure optimal cleaning results. Kränzle has recognised these needs and developed precisely matching devices and accessories.

- Metalworking workshops
- Paintshops
- Carpentry workshops
- Bakeries
- Joineries

PUBLIC SERVICE, CONSTRUCTION INDUSTRY

Cleaning tasks in public service require professional devices without any compromises. Kränzle's high-pressure cleaners are the ideal partners when cleaning construction site vehicles, transporters, public squares or removing graffiti from facades. The wide product range offers just the right device for any need.

- Building trade
- Municipalities
- Fire brigade
- Railway
- Rescue services

HYGIENE SECTOR, SANITARY FACILITIES

Hygiene and sanitary areas such as butcher's shops, slaughterhouses and sanitary facilities require abrasion-proof tyres and high-pressure hoses. Kränzle's NoM (Non-Marking) versions meet these requirements. White full rubber tyres and grey high-pressure hoses leave no marks of abrasion. Most of Kränzle's high-pressure cleaners are available in a NoM version.

- Butchers' shops and slaughterhouses
- Sanitary facilities
- Pipe, sewage and industrial service
- Sewage technology

INDUSTRY

The areas of use in industrial operations offer enormous diversity. Factory halls and machines regularly must be cleared of dust, dirt and oil contamination. With its broad and deep range, Kränzle offers everything that industrial operations need.

- Machines and plant construction
- Steel construction
- Wharf/ship building

TOP TECHNOLOGY IN DETAIL

TECHNICAL HIGHLIGHTS

WHY PICK A KRÄNZLE?

If you opt for the Kränzle brand, you will always receive sophisticated high-pressure cleaners with technical benefits that impress all around. Many of these technical details are innovations that originate in the Kränzle development centre in Illertissen. As a result, users profit from the top quality Made in Germany, confident cleaning power and particularly long service life.

PUMP HEAD MADE OF SPECIAL BRASS

Deterioration of the pump caused by corrosion is impossible as a result of selecting superior quality materials. The water-conducting components of the pump head and safety devices are made of stainless steel and special brass to ensure long service lives.

STAINLESS STEEL PRESSURE GAUGE

All high-pressure cleaners are equipped with large, clearly visible, glycerine dampened stainless steel gauges.

STAINLESS STEEL PLUNGERS (PISTONS) WITH CERAMIC COATING

All Kränzle high-pressure cleaners are equipped with ceramic coated stainless steel plungers, considerably increasing life-time of the machines. The good thermal conductivity of a stainless steel plunger is unified with the positive characteristics of a ceramic coating (extremely low-wear surface).

DURABLE HIGH PERFORMANCE MOTOR

Large dimensioned durable motors in the usual high Kränzle quality for extreme durability and highest performance. High-pressure cleaners with slow-running 4-pole electrical motors (1,400 rpm) work at lower speeds to reduce start-up currents and quieter noise levels as well as reduced wear.

BYPASS OPERATION

Kranzle high-pressure cleaners switch over to a pressure reduced bypass operation as soon as the trigger gun is released. The water is circulated with a residual pressure of approx. 10 bar. Models with Total-stop-system switch off at this point. The high-pressure pump and motor are discharged leading not only to a significant prolongation of the service life but to energy savings as well.

DRY-RUN SAFETY AND LEAKAGE RETURN SYSTEM

Kranzle high-pressure cleaners are equipped with a fabric sleeve and a Teflon graphite backing ring. The excellent lubricating properties of Teflon graphite serve to reduce both the friction and temperature inside the pump. For this reason, Kränzle high-pressure cleaners can be run without water for quite some period without suffering any damage. A water cushion between the high-pressure seals on the plungers prevents any sucked in air from reaching the pump chamber.

OPERATING PRESSURE, CONTINUOUSLY ADJUSTABLE

For all machines the operating pressure and the amount of water being sprayed can be exactly adjusted to suit the cleaning task.

Fig. Kränzle factory 1 (main factory) - Rudolf-Diesel-Straße 20, 89257 Illertissen (Germany)
Development, production and sales

Fig. Kränzle factory 2 - Siemensstraße 17, 89257 Illertissen (Germany) Rotation system, logistics and shipping processing

ROTO-MOLD CHASSIS

The machines of the seriess K 1152, K 2000, Profi, quadro bully and therm are equipped with a Roto-Mold chassis. This extremely firm and torsion resistant frame maximises the stability of the high-pressure cleaner. The motor and pump lie well protected within the frame thus guarded against impacts from outside. These Kränzle chassis are virtually indestructible.

WATER TANK

The integrated water tank (in the machines of the Profi, quadro and therm series) serves as a water buffer between the main water supply and the high-pressure pump to prevent most pump damage caused by a lack of water. This design also offers application of chemical agents at full operating pressure and without a low-pressure injector a further advantage is an increased performance at the lance.

NEAT STORAGE SYSTEM

Storage receptacles for trigger gun with safety catch and lances ensure best working conditions and quick access to accessories.

HOSE DRUMS

Models with hose drums offer maximum convenience and avoid tripping hazards caused by high-pressure hoses that are not coiled up. The large hose drums allow the use of up to 30 meter hoses, depending on the model, and therefore a much greater range.

OFF-ROAD CAPABILITY AND STABILITY

The extremely stable and robust chassis enables effortless transport even in rough terrains and provides for high stability during application. Thanks to the largely dimensioned wheels, small obstacles can be easily managed.

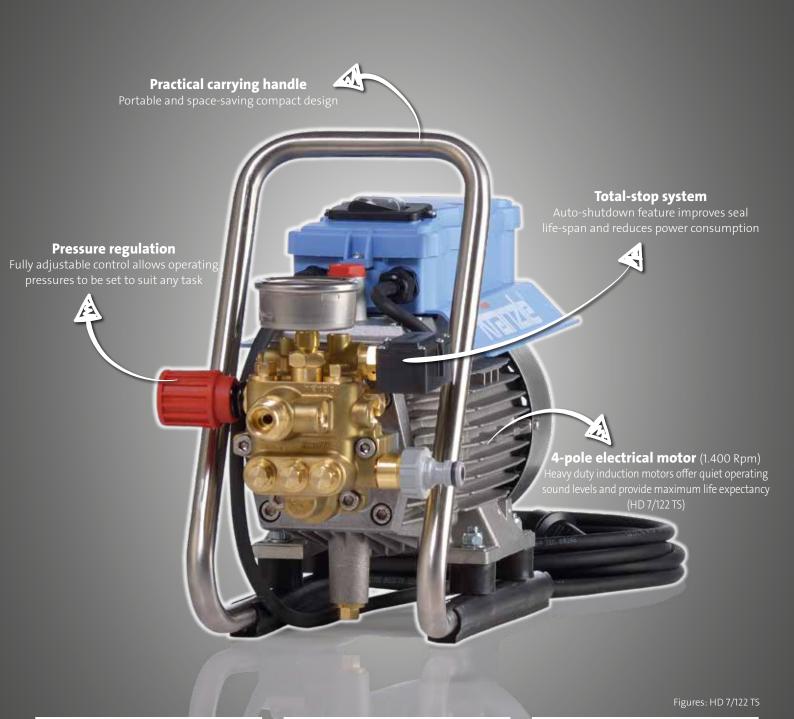

CLEANING AGENT INTAKE

For intensive cleaning in cases of heavy soiling a diversity of Kränzle high-pressure cleaners provides direct detergent suction. In case of machines with integrated water tank, detergents are applied by high pressure. For machines without water tank, the cleaning agent is applied by an injector with low pressure.

412301

TECHNICAL HIGHLIGHTS!

INTEGRATED WATER TANK

412311

The integrated water tank mostly prevents pump damage from lack of water.

412321

The water tank can be removed in a few steps when the device is required to suck water from a larger external water tank or reservoir.

The bully-Series

Integrated Hose drum

Practical design and features a longer length high-pressure hose complete with folding crank (TST design)

Quick-release fittings for simple and quick lance changes

Pressure regulation
Fully adjustable control allows operating
pressures to be set to suit any task

Neat storage system

Holders for trigger gun with safety catch
and lances

Total-stop systemAuto-shutdown feature improves

EXPERT TIP!

STAINLESS STEEL TROLLEY

The large quadro series is also available with a Stainless steel chassis.

- Corrosion protection Extremely stable

For detailed technical information, see page 79

Water output > 1000 l/h

EXPERT TIP!

TURBOKILLER LANCE (optional quadro TS)

Incredibly powerful rotating, concentrated jet with stainless steel tube. To remove stubborn dirt. Standard issue equipment with hose drum version or optionally available for the quadro series without hose drum.

For more on this, see pages 60-67 (Accessory Compatibility)

TECHNICAL HIGHLIGHTS!

COMBUSTION ENGINE

The Kränzle high-pressure cleaners with combustion engine offer greater performance than any single-phase electric device. The most effective solution for cleaning of areas with no available power supply.

- Operation without electrical connectionWater intake from separate tank is possible

COLD WATER – WITH COMBUSTION ENGINE

The Profi-Jet-Series (stainless steel trolley - without hose drum)

Trigger gun with safety catch and lance replaces one-piece design

The therm CA-Series

Practical design and features a longer length high-pressure hose complete with folding crank

Operating panel arranged for good overview

with adjustable rotary thermostat for

Removable covers

Protect the mechanical components from environmental factors and provide convenient access

Cleaning Agent Intake Injector system for dispensing of cleaning agents

Pressure regulation

Fully adjustable control allows operating pressures to be set to suit any task

Parking brakeFor a secure stationary position

HOT WATER - OIL HEATED

TECHNICAL HIGHLIGHTS

KRÄNZLE-THERM SET NEW STANDARDS WITH THEIR TECHNICAL ADVANTAGES!

The Kränzle therm hot water high-pressure cleaners combine a number of technical innovations by Kränzle that contribute to reliable operation, safety of the equipment and not least operating and servicing. The Kränzle therm cleaners are extremely safe to operate, kind to the environment, clean and quiet. The Kränzle therm high-pressure cleaners represent the state-of-the-art in equipment and safety.

1. SAFETY VALVE

protects the device from undesirable excessive pressure build-up

2. FLOW MONITOR

prevents overheating of the heating chamber caused by a lack of water.

3. PRESSURE SWITCH (BURNER)

heating is only possible when pressure from the pump is detected.

4. PRESSURE SWITCH (DEVICE)

controls automatic device stand-by feature if the trigger gun with safety catch remains closed for 30 seconds.

5. OVERCURRENT PROTECTION

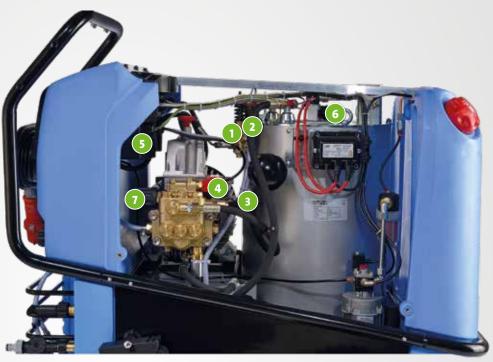

switches off the high-pressure cleaner caused by excessive power intake.

6. DIGITAL FLAME MONITORING

switches off the fuel supply if the burner flame goes out.

7. PRESSURE REGULATION CONTROL VALVE

allows for smooth control of the water volume and water pressure, as well as pressure-free bypass operation.

DIGITAL THERMOSTAT therm-1-Series

OPERATION MODE 1: THERMOSTAT REGULATION °C

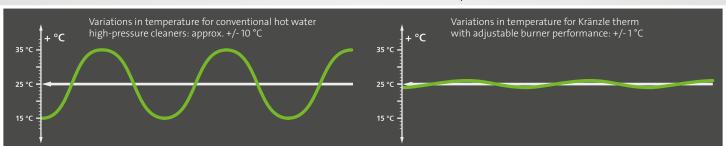

The desired water temperature is specified in °C. A thermostat measures the temperature at the end of the heating coil and controls the burner until the desired temperature is reached. (The ACTUAL temperature is displayed.)

OPERATION MODE 2: BURNER OUTPUT %

The burner is switched on and off at a corresponding cycle frequency based on the percentages set (TARGET value). The water temperature at the end of the heating coil is indicated as ACTUAL value in °C. The advantage of this operating mode is in a water temperature maintained precisely to one degree (+/-1°C), even at operation with partial volumes and at low temperatures.

OPERATING HOURS COUNTER

The device displays both cold and hot operating time information separately which can assist with determining appropriate servicing intervals and requirements.

■ Descaling of hot and cold water high-pressure cleaners

Removal of lime deposits

412580 412570

Important note:

When using chemical cleaning agents, observe the respective regulations, provisions, safety notes and safety data sheets.

**pH value: Undiluted

We recommend testing the cleaning agent on the surface to be cleaned before starting.

EXPERT TIP!

NON-MARKING (NoM)

Nearly all Kränzle-high-pressure cleaners are also available in a special design to prevent dark rubber marks on sensitive light floors.

- Wheels with white tyre rubber
- High-pressure hose in grey

For availability, see pages 74-87 (Technical data)

Please indicate the technical data of the high-pressure cleaner when placing your order.

EXPERT TIP!

ANIMAL CARE MADE EASY

Equip your Kränzle Ventos vacuum unit with the Kränzle animal hair brush. The brush attachment clearly reduces dust development in animal care. Vacuuming improves fur cleaning and reduces the risk of pressure points.

583930

Suction brush [584020]:

- 175 mm
- with hook-and-loop closure

INDUSTRIAL VACUUM CLEANERS

TECHNICAL HIGHLIGHTS

THE KRÄNZLE VENTOS SERIES EXCEEDS EXPECTATIONS IN WET AND DRY VACUUMING!

The wet and dry vacuum cleaners Kränzle-Ventos are the best example of the innovative power of Kränzle. The sophisticated construction principle offers best function, suction power and stability with its many technical details.

FILTER ELEMENTS MADE OF PES FIBROUS WEB

The filter elements are dirt-repelling, washable and extremely durable. They can be replaced easily without tools. Water extraction is possible without replacing the main filter cartridge.

ELECTRONIC LEVEL MONITOR

When sucking in liquids 2 electrodes switch off the turbine automatically as soon as the maximum liquid level is reached.

ELECTRICAL POWER TOOL SOCKET WITH POWER-UP AND CUT-OUT DELAY

The power tool electrical socket enables the direct connection of power tools that have an extraction feature. The switch-on delay causes the vacuum to start after the electric power tool, so preventing current peaks and possible tripping of the fuse during the starting process. The delayed cut-out allows the residual dust to be sucked out of the suction hose. The work area and hose are always left clean when the work is completed.

HIGH STABILITY

Due to the compact and rounded design the Ventos can be easily and conveniently carried and moved even on staircases and scaffoldings. The compact structure with its low centre of gravity guarantees a firm foothold even on rough surfaces and during transport in vehicles.

ELECTRONICALLY ADJUSTABLE VACUUM POWER CONTROL

The suction power control allows the suction to be adjusted to the required level. This makes it impossible for nozzles or power tools to "stick" to smooth surfaces due to too much suction.

ACCESSORIES STORAGE

The back of the casing is designed as useful storage for accessories. The accessories can be carried on-board and are always to hand for quick and easy exchange.

EXHAUST AIR VENTILATION CONNECTION

Ventos wet and dry vacuum cleaners come fitted with a connection fitting suitable for blowing either air or water. The blow feature automatically starts when a hose is connected to the back connection, working singularly or in serial with your suction hose
